

## UPUTSTVO ZA POSTAVLJANJE BROJAČA POSETA

**1** Potrebno je da nam pošaljete zahtev da vam omogućimo postavljanje brojača za vaš web site na [office@ravangrad.net](mailto:office@ravangrad.net).

**2** Kad dobijete odgovor od naše tehničke podrške potrebno je da u vašem web browseru otvorite : <http://www.ravangrad.net/cgi-bin/setup.cgi>. Na ovaj način pokrećete softver za podešavanje brojača za vaš web site.

**3** U drugom koraku potrebno je da podesite osnovne parametre vašeg brojača : a) **Counter Type** - podesite na Image Counter(GD) b) **Counter Name** - unesite korisničko ime koje koristite za FTP konekciju c) **Digit Style** - u ovom polju birate izgled vašeg bojača d) **Number of digits** - u ovom koraku podešavate broj cifara u početnom ispisu broja. e) **Count if user reloads/refreshes pages** - u ovom polju birate da li će se vrednost brojača uvećavati ukoliko korisnik uradi Refresh stranice

The image shows a web form titled "Perl Counter Setup". The form contains the following fields and options:

- Counter Type:** A dropdown menu with "Image Counter (GD)" selected.
- Counter Name (numbers and letters only):** A text input field containing "testkorisnik".
- Digit Style (for image counter):** A dropdown menu with "bluesky" selected.
- Number of digits (adds leading zeros):** A dropdown menu with "1" selected.
- Count if user reloads/refreshes page:** An unchecked checkbox.
- Generate HTML:** A button at the bottom of the form.

At the bottom of the form, there is a small copyright notice: "BS Counter v2.5.3 • Copyright © 1999-2005 Brian Starback".

4 U trećem koraku vam je prikazan izgled vašeg brojača i osnovno upustvo kako da postavite brojač na željenu web stranicu. Potrebno je uneti osenčeni deo, odnosno u ovom primeru :

```

```

, na mesto gde želite da se prikazuje brojač poseta vašeg web site-a.

Perl Counter Setup

The counter is ready to be placed on your page. Your counter digits will look like this...

**0123456789**

To add the counter to your web page, add the following into your html source, also note that you need to edit the gd-count.cgi script and add your domain/site to the @allowed.

```

```

Note: To make the counter hidden, add <div style="display: none; visibility: hidden;"> before the code and </div> after the code.

Once you have installed the counter, you can view your site statistics by linking to or visiting the following URL:

<http://www.yourdomain.com/pathtocounter/stats.cgi?page=test-korisnik>
